

Nahin Uday

Full Stack Developer

I want to pursue a career in full stack development. I like to explore new things from an early age. I always like to solve problems. I have the ability to work under pressure. But as a freshman, I need opportunity to prove myself. I want to build a professional carrier where i can use my skills.

PERSONAL PROJECTS

PSO and Neural Network

- https://github.com/NH-Uday/pso_neural_network
- Its a python based project for my research paper.

Car racing (2019)

- <https://github.com/NH-Uday/Graphics-project>
- Its a fun game build with C++.

My Portfolio site (2020)

- <https://github.com/NH-Uday/me>
- This is my official portfolio site. Its build using bootstrap.

Doctor Schedule (2018)

- https://github.com/NH-Uday/Doctor_schedule
- Its a windows platform application for scheduling the medicine and doctor's appointment

Online E-commerce site (2020)

- https://github.com/NH-Uday/online_shop
- Its an official E-commerce website build with laravel.

PAPERS

Particle Swarm Intelligence algorithm implementation and performance analysis on training of a Neural network

Main author

Research Project

Modified 6LoWPAN and UDP for IoT Devices

Main author
